

Practice Nurse – Cove and Kincorth Medical Practice

30 hours per week but willing to consider full time for the right candidate

Salary Dependent on Experience

About the Role

We are looking for a motivated and enthusiastic **Practice Nurse** to join our friendly and supportive team. The successful candidate will lead and deliver **nurse-led chronic disease clinics**, with a particular focus on **hypertension** and **respiratory care** (asthma and COPD).

We welcome applications from experienced practice nurses **and** from nurses looking to develop in chronic disease management — full training and support will be provided.

Depending on qualifications and experience, we would also consider appointing a Treatment Room Nurse with a willingness to train into chronic disease management.

Key Responsibilities

- Lead and undertake **chronic disease clinics**, including hypertension, asthma, COPD, and general respiratory reviews.
- Provide individualised care planning, lifestyle advice, and self-management support.
- Conduct assessments and monitoring in line with clinical guidelines and local pathways.
- Perform and interpret spirometry (if competent or willing to train).
- Support treatment room services where required (e.g. wound care, injections, ECGs, cervical screening — depending on skill set).
- Maintain accurate and timely clinical records using practice systems.
- Participate in audits, quality improvement work, and health promotion.
- Work collaboratively with GPs, ANPs, pharmacists, and the wider MDT.

About You

- Is a registered nurse (NMC).
- Has experience in primary care or a genuine interest in developing chronic disease management skills.
- Is competent in — or keen to train in — **hypertension** and **respiratory care**.
- Can work independently, prioritise workload, and make evidence-based decisions (or is committed to developing these skills).
- Communicates well and provides compassionate, patient-centred care.
- Works well as part of a supportive, multidisciplinary team.

Desirable (but not essential — training can be provided)

- Experience or formal training in spirometry.
- Respiratory or cardiovascular qualifications.
- Chronic disease management modules or primary care experience.
- Familiarity with NICE best practice and local care pathways.
- Treatment room experience (for applicants applying on that basis).

What We Offer

- Full training and development opportunities for nurses expanding into chronic disease roles.
- Supportive, welcoming team environment.
- Access to CPD, mentorship, and role development pathways.

More details about our practice are available on our website – www.covebayandkincorthmedical.co.uk

Informal enquires and a practice visit are welcome. Contact Debbie Foreman, Lead Practice Nurse, 0345 337 1170

Please apply in writing with a CV and covering letter to:-

Susan Gillan, Practice Manager

Cove Bay and Kincorth Medical Practice gram.kincorthadministrator@nhs.scot

Closing date – Friday 29th May 2026. Please note we may close the advert early should we receive a high level of applications.
